

PRACTICAL INSTRUCTIONS FOR HEALTH
AND CUSTOMS FORMALITIES
(Morocco Royal Tour)
(EDITION 2025)

I. Accompanying

To ease the preparation of veterinary and administrative records for the transit, the **Morocco Royal Tour**, in collaboration with the concerned officials' services, make available to the horse owners a personalized support for the preparation of the formalities, the reception at ports and airports in Morocco and routing to the stables as well as for the return (Travel back).

The following company was mandated to assist any person wishing to entrust this task.

HORSE LOGISTIC COMPANY

Contacts:

➤ **Philippe Apert**

E-mail : apert.philippe@gmail.com

Tél : +336 07 76 42 43

Fax : +33 5 56 43 84 80

In parallel, a **coordination unit** will assist in health and customs certification, the following contacts will answer any questions or request for information on this subject:

- **Dr. A. Mabrouk :**

GSM: + 212 661 49 49 61

e-mail :

vetmab2002@yahoo.fr

- **Dr. A.Zejjari :**

GSM: +212 661 91 65 25

e-mail :

zejjari@gmx.com

II.Summary of the formalities

After confirming your participation, and to facilitate the transit, it is necessary to send to the coordination unit, and the transit agent (partidahorses@partidalogistics.com) the copies of horse identification in order to prepare the importation.

Copies of other documents that are mentioned below, must also be sent for verification and preparation of the control in Spain and Morocco.

Two files should be prepared:

1. A Health record including:

1. The horse passport or an accompanying document.
2. The health certificate, the standards form is available on the website, signed by the official veterinarian and not a private veterinarian (all countries).
3. Horses must be correctly vaccinated against **influenza** and **Rhino-pneumonia**.
4. Laboratory analysis certificates stamped by the official veterinarian who prepared the health certificate.

A. European Union (EU) and Switzerland

- **Infectious anemia (Coggins test):** within 30 days before starting.
- **Surra (trypanosomiasis):** ELISA Test or CATT, within 15 days before starting
- **African Horse Sickness:** Indirect ELISA or ELISA Bloquant, within 21 days before starting
- **Dourine and Glanders:**
within 15 days of export, **except horses** from the European Union (EU) - Switzerland – United Kingdom, who have not left these territories (EU-Switzerland-UK) during the last six months prior to export; except for travelling to Canada and the USA.

B. United Arab Emirates

- **Infectious anemia (Coggins test):** within 30 days of export.
- **Surra (trypanosomiasis)** ELISA Test or CATT, within 15 days of export.
- **Dourine and Glanders:** within 15 days of export.
- **African Horse Sickness:**
 - If the horse has been not vaccinated: one single analysis 10 days before departure
 - If the horse has been vaccinated against the African Horse Sickness: two analysis are necessary, carried out on samples of blood taken of between 21 and 30 days, the second of which must have been taken within 10 days of export without increase in antibody count.

C. Arab and MENA countries: KSA, Bahrain, Oman, Qatar, UAE, Jordan, Egypt, Algeria and Tunisia

- **Infectious anemia (Coggins test):** within 30 days of export for horses from all countries.
- **Surra (trypanosomiasis) ELISA Test or CATT,** within 15 days of export.
- **Dourine and Glanders:** within 15 days of export.
- **Viral arteritis:** within 28 days of export.
- **African Horse Sickness:**
 - If the horse has been not vaccinated: one single analysis 10 days before departure
 - if it has been vaccinated: on two occasions, carried out on samples of blood taken between 21 and 30 days, the second of which must have been taken within 10 days of export without increase in antibody count.

D. United Kingdom and Northern Ireland:

Riders from the UK and Northern Ireland are encouraged to complete their horses' transit health certificates at the European Union level (particularly in France). **HORSE LOGISTIC COMPANY** in Bordeaux is available to facilitate this process. Health certificates for transit through Europe are no longer accepted by Spanish health authorities.

The Sanitary file for companion animals (pets) originating from the EU:

If you wish to bring with you pets (dogs), they must satisfy the following conditions:

- **be identified by an electronic chip** (transponder) implanted under the skin;
- **have a valid vaccination against rabies** (primary immunization and booster);
- **have undergone a serum antibody titration of rabies antibodies** (laboratory examination performed on a blood sample that ensures the effectiveness of the rabies vaccination of the animal) that was carried out in a laboratory approved by the European Union at least 30 days after the vaccination of the animal and at least three months before its importation. The serum titration result must be greater than or equal to 0.5 IU / ml.

2. An administrative record including:

- The **ATA Carnet** indicating the horses and the equipment is provided by the local chamber of commerce.

III. Forwarding Agents (Transitaires)

Two national transit persons are conventioned with the organizers for the formalities both on the Spanish side and on the Moroccan side.
